

### ADVANTAGES

- Allows on-line filter replacement of earlier stages
- Suitable for high velocity applications
- Guard filter in combination with a high velocity bag filter

<b>Application</b>	Suitable for all environments including high velocity air inlet systems. Typical for coastal and offshore installations Pre-filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures
<b>Frame</b>	Stainless steel
<b>Gasket</b>	Flat gasket
<b>Media</b>	Synthetic
<b>Rec. final pressure drop</b>	250 Pa
<b>Max Temperature (°C)</b>	70°C
<b>Relative Humidity max</b>	100%
<b>Installation Options</b>	Between bag/compact filter and filter-bank
<b>Comment</b>	Additional information: Designed for use in combination with Cam-Flo GT HV.  Product Features: Durable media Low pressure drop Allows on-line filter replacement Reduced overall TCO Solid corrosion resistant frame in stainless steel Designed for use in combination with Cam-Flo GT HV

The CamGuard is a coarse filter that is installed downstream of the Cam-Flo GTX7, allowing online filter replacement thus reducing costly downtime.
